131S Square Base Wall Plate

Key clamp fitting for tubular handrails, barriers and frames

Tube sizes
42mm

A square base version of the 131 round wall plate. Ideal for furniture, railings or other places where a round wall plate may be too big. The tube can pass through this fitting.

Dimension drawing to follow.
Sizes, weights and part numbers are in the table below.

SIZES AND DATA

		42mm C42
Part number		**131S-C42**
ORDERING		
Barcode	GTIN	nan

Material: Malleable cast iron (ASTM A197) **Finish:** Hot-dip galvanised

Sizes and weights are nominal figures from the foundry's data. These are galvanised castings, so individual fittings vary and it is normal for one to measure or weigh a little differently. Check the fittings in your hand before cutting tube or drilling fixing holes. Not for use as building or construction scaffolding. The strength of a structure depends on the fittings, tube and fixings chosen and on what it is fixed to. Choosing the right size and type of fitting for the job is the customer's responsibility. If in doubt, ask us.
